

oiled hardwood

CARE + MAINTENANCE

DAY-TO-DAY

keep it simple with a well wrung-out rag, baby soap and a good oil conditioning regimen. wipe away any moisture left on a wood surface with a cloth or paper towel, and avoid extreme heat.

CONDITIONING OIL

oil conditioning lifts dirt from the wood surface and restores its natural luster. we use and recommend parker + bailey natural lemon oil polish. avoid pledge, method, and wood/all-purpose cleaners

CONDITIONING REGIMEN

after one month, then two, then three (or more often), apply and spread evenly with a rag. allow to absorb for 10 minutes or overnight, then wipe with a dry cloth. keep the oiled rag for next time.

TOUCHUP

scratches and stains just need just #0000 synthetic steel wool and conditioning oil. rub with the grain direction and apply pressure as necessary, then oil. if your furniture needs some extra love, get in touch - we're here to help.
